## About Myself and Why I am applying?

AUGUST 2020 — AUGUST 2020

I am an aspiring full stack developer who is really looking forward to doing industry-based web applications and work. Previously I have worked in i4ware software as a web developer and I am looking for a role in the education-based knowledgeable work and I am really enthusiastic about working in a company where I can grow myself as a developer and the new challenges and give upon my best. I have the standard knowledge of every stack in web development but my skillful stack is using React and JavaScript. Besides that, I have worked with embedded systems and software related to using Arduino in my university. if there is any chance that I can be a part of this great innovative company and build my career as a learner and working towards for the best of the company it would be my privilege. Currently, I am working on many projects but I want to be honest that I am looking for some challenges where I can really put some of my essential skills which I hope would be a great chance for me. . Here I am sending my professional CV and a link to the GitHub account where I have showcased my projects and work for the better knowing [.https://github.com/FAHID-KHAN](https://github.com/FAHID-KHAN).At last I just want to add that I have just started

my career and I am really into the tech world, I believe that learning by doing is the key route to success and I just need a push start so that I can do more better, learn better and a chance from this innovative company will mean a lot to me.

Best Regards
